YOUR LOCAL 'FIX-IT' SHOP

Remember when there was a 'Fix-It' shop in every town?

In this 'throw away' world, those day's are long gone. But there is a place where you can take your favorite piece of electronic gear and get a free professional opinion on the viability of an effective repair and what other options you might have.

You can bring your favorite radio in, regardless of age or brand, to get a power cord repaired or have a broken connector soldered on your laptop. You need not limit yourself to TV repair or household electronics because we have repaired room heaters, corn humidity testers, CNC controllers and obsolete embroidery equipment.

Whether your goal is to revive your favorite electronic device, save some money or keep usable products from filling the land fills, make **Rex Service Company** your local 'fix-it' shop.

We will give you a FREE professional evaluation at our counter and attempt a repair on anything you have for \$60.00 per hour, \$20.00 minimum*. *Excludes Regular Repair Categories Including: Plasma, LCD and Projection TV
